Annual Sustainability Report Summary — 2025

Document ID: EN-REP-02 **Department:** Corporate Sustainability **Reporting Period:** Calendar Year 2025 **Prepared By:** Corporate Sustainability Team **Distribution:** Public / Investor Relations

1. Executive Summary

This report summarises Meridian Holdings Group's environmental, social, and governance (ESG) performance for the 2025 calendar year. The Company reduced its Scope 1 and Scope 2 carbon emissions by 11.3% compared with 2024, driven primarily by the LED lighting retrofit programme and increased procurement of renewable electricity. Employee turnover decreased to 14.2% from 17.8% in 2024. The Company did not report any material environmental incidents during the year.

2. Environmental Performance

2.1 Total Scope 1 and 2 carbon emissions were 8,420 tonnes CO2-equivalent in 2025, down from 9,495 tonnes in 2024.

2.2 Renewable electricity now accounts for 34% of total electricity procurement, up from 21% in 2024, following the signing of a new renewable power purchase agreement covering Distribution Centres 2 and 4.

2.3 Waste diverted from landfill across all sites reached 76%, against a target of 70%, driven by expanded cardboard and plastic recycling programmes at all distribution centres.

3. Social Performance

3.1 Employee turnover fell to 14.2% in 2025, which the Company attributes in part to the expansion of the Remote Working Policy (EN-POL-06) and enhanced parental leave benefits introduced in the Employee Leave and Attendance Policy (EN-POL-02).

3.2 The Company recorded a Lost Time Injury Frequency Rate (LTIFR) of 2.1 per 200,000 hours worked, an improvement from 2.8 in 2024, reflecting the impact of the expanded forklift training programme (EN-MAN-03) and enhanced fire warden coverage (EN-MAN-07).

3.3 Employee engagement, measured through the annual survey, showed an overall satisfaction score of 74%, up from 69% in 2024.

4. Governance

4.1 All employees completed mandatory Code of Conduct and Anti-Bribery training during 2025, with a completion rate of 99.4%.

4.2 The Whistleblowing Hotline received twelve reports during 2025, all of which were investigated and closed in accordance with the Company's Whistleblowing Procedure.

5. Targets for 2026

- Reduce Scope 1 and 2 emissions by a further 10% against the 2025 baseline
- Increase renewable electricity procurement to 50% of total consumption
- Reduce LTIFR to below 1.8 per 200,000 hours worked

6. Approval

Approved for publication by the Chief Sustainability Officer and Executive Committee on 28 February 2026.
